

Instructions

Welcome to the "fair trade" board game!

- For playing this game you need to be 2-6 players.
- You need to move your pawn according to the dice.
- On the board each step has a color, **green**, **blue** or **red**.
- If you step on **green**, you need to pick a green card. Green cards are the info cards that they can help you move on the game by learning.
- If you step on **red**, you need to answer a question about fair trade. One of the other players should take the card and make the question to you. If you answer correct you can move one step forward 😊. If not, you should go one step back 😞. No further action to your new place is needed.
- If you step on **blue**, you need to pick a blue card. Blue cards are the action cards that they contain fair trade facts. According to the fact you should go some steps back or forward... Each card says how many steps. No further action to your new place is needed.

Whoever goes first at the end, is the winner :D

Enjoy!!!
